

Card Compromise Assistance Plan

Assistance you can rely on

As a customer of TSYS Merchant Solutions you depend on us to look after your interests in the payment processing industry while you run your business. Customer requests led us to research and secure the highest levels of assistance available in the industry today for businesses in the event they are targeted by card data thieves.

The Card Compromise Assistance Plan (C-CAP) provides business owners peace of mind knowing they are protected from the crippling expenses associated with a real or suspected card breach.

Protection From Crippling Expenses

Compliance with Payment Card Industry Data Security Standards (PCI DSS) provides your business with a front-line defense against compromises and is required by the card brands. C-CAP provides you with assistance in the event of a card data breach. No business is exempt from an attack by criminals. Small businesses have increasingly been the focus of criminals.

The Card Compromise Assistance Program provides your business **up to \$100,000 per merchant identification number** and potentially up to \$1,000,000 annually for multi-location businesses, to assist with the following expenses:

- Mandated forensic audit expenses when a compromise is suspected.
- Card replacement costs and related expenses from an actual or suspected breach.
- PCI DSS assessments and fines levied by the card brands for data breaches.
- Assistance with data breaches due to network hacking, skimming and physical losses resulting from: third-party theft of computer or paper records; and/or in certain instances, employee dishonest, fraudulent, malicious or criminal act, error or omission.

Reduces Monetary Exposure

C-CAP is a unique assistance plan designed to reduce monetary exposure in the event of a cardholder data compromise. C-CAP is designed specifically to meet the expenses resulting from a suspected or actual breach of credit card data from a business.

The program is offered exclusively by Royal Group Services.
