

## TSYS Hosted Payment<sup>SM</sup>

Secure, hosted, IFrame payment acceptance solution

Focus on running your business, let TSYS Hosted Payment put your data security worries to rest.

### Key Benefits

#### Reduce Data Security Risks

Maintain your branding and the look and feel of your own site while accepting payments on the secure TSYS server. With TSYS Hosted Payment sensitive cardholder data is not entered, transmitted or stored on your site, reducing your data security risks and compliance requirements.

#### Data Security

With the latest technology securing each transaction, data security worries are greatly reduced. Security options help protect each transaction and no card data is stored electronically on your site which eliminates a major vulnerability.

#### Automated Updates

Automated compliance and required industry updates are made on the TSYS server, without impacting your technical resources.

### How Does it Work?

TSYS Hosted Payment is sometimes referred to as an IFrame or hosted solution. Sensitive cardholder data is not entered on your server and is protected by the latest secure technology.

1. At checkout, your customer is redirected to the TSYS hosted payment server to enter the credit card information, while staying within the look and feel of your website.
2. Transaction data is sent over an encrypted SSL connection.
3. Card is authorized and processed on the TSYS server.
4. Payment authorization is received and the transaction is complete.
